21/10/2026

- What i did - i organised the group together so that everyone knows the task in mind. I created a group chat where we can communicate and assign roles. I took on the role as CEO to supervise all the work at hand.
- What to improve- communication is key in most cases and especially this one. I need to communicate my ideas more clearly with everyone so that we are all on the right track.
- What is next- i need to further work on the 4 separate submissions in Lexue, ensuring that everyone in my group has completed their task accordingly with no compromises at the moment

22/10/2026

- What I did- I continued the progress we made yesterday and have managed to make a few submissions already. Specifically, i made a canva template for our project log and approved designs on the rough plan and github structure
- What to improve- further cohesion was achieved but more spontaneous decisions need to be made so that the work flow of mine and others do not disrupt each other.
- What is next- complete the submission before the deadline.
