Personal Learning and Work Log
CSMAXXING
Stage 1
(As of 26/10/2026)

Sean Dylan Herlyanto 1820262084 CEO	
Date	Details
21/10/2026	• **Activity:** I organised the group together so that everyone knows the task in mind. I created a group chat where we can communicate and assign roles. I took on the role as CEO to supervise all the work at hand. • **Improvements:** communication is key in most cases and especially this one. I need to communicate my ideas more clearly with everyone so that we are all on the right track. • **Future Plans:** I need to further work on the 4 separate submissions in Lexue, ensuring that everyone in my group has completed their task accordingly with no compromises at the moment 

22/10/2026	• **Activity:** I continued the progress we made yesterday and have managed to make a few submissions already. Specifically, i made a canva template for our project log and approved designs on the rough plan and github structure • **Improvements:** further cohesion was achieved but more spontaneous decisions need to be made so that the work flow of mine and others do not disrupt each other.  • **Future Plans:** complete the submission before the deadline
23/10/2026	• **Activity** we gathered as a whole team in the apartment where we discussed and finalised all the submission for stage 1 we managed to complete all submissions today and i managed to be comfortable with github • **Improvements:** this day is a good improvement on yesterday as we were more relaxed but it doesn't mean we should procrastinate more. Moving forward, we should be more alert and finish the task before our leisure time. • **Future Plans:** slowly finish planning the live lectures, PPT and other study components throughout the week
27/10/2026	• **Activity:** after reviewing the feedback sent from our teacher, we collectively fixed and issues and misunderstandings we might have glanced or been oblivious to. For example, the github repository has apparently been misunderstood and we missed a lot of documents in it. •**Improvements:** we realised that we should have been more alert on the instructions provided and cross reference other materials instead of trusting our instincts to do so. As a result, we plan to actively question the validity and reliability of our work through all means necessary to bring out the best in us.

	 • **Future Plans:** learn from this mistake and continue to make the necessary preparations for the learning center and work on our learning materials. 

Kenji Sukilim 1820262079 CIO

21/10/2026	• **Activity:** I led the main research for our project, CSMAXXING, covering AI's definition, functions, types, capabilities, applications, pros, and cons. I also brainstormed creating PowerPoint, demonstrations, and interactive activities. • **Improvements:** I previously thought AI could solve any digital problem without knowing about the digital divide. I now realize it has drawbacks, such as high complexity and resource demands. • **Future Plans:** Making the rough plan canva
22/10/2026	• **Activity:** I built the CSMAXXING Canva presentation using Hayden's materials—workflow, guidelines, study guides,

	videos, summaries, games, and a table of contents—to plan our lecture's timing and execution.

	• **Improvements:** I learned to enhance Canva's design to make the content easier for students to understand. • **Future Plans:** Making the table of contents
26/10/2026	• **Activity:** My teammate and I fixed our study guide's table of contents, formatting all my research properly. This opportunity to resubmit our unfinished work made us realize how much content our first stage lacked. • **Improvements:** I realized following basic instructions is crucial to project quality. I learned not to rush assignments, but rather to reread and follow guidelines to ensure CSMAXXING submits a complete project. • **Future Plans:** Work on stage 2 of the project

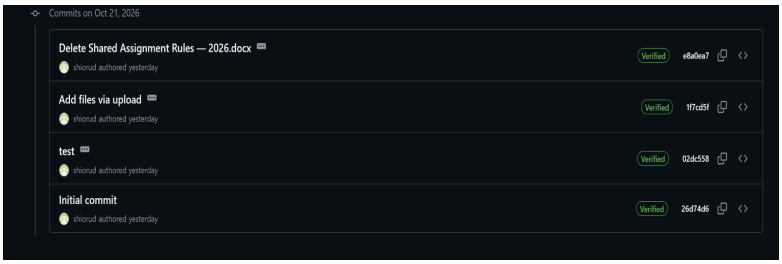

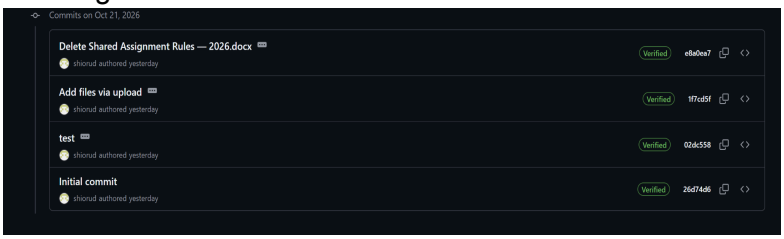

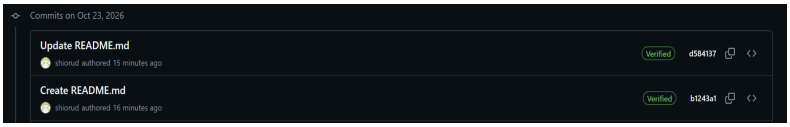

Chrysander Hayden Gunawan 1820262126 Designer

21/10/2026	• **Activity:** I joined the team session, created the Discord server, researched our topic, documented work, and practiced using GitHub. • **Improvements:** I learned my role as designer, connected with teammates, and realized I need to procrastinate less and listen better to our leader. • **Future Plans:** I will create the rough plan and improve my GitHub skills.
22/10/2026	• **Activity:** I completed the rough plan, started the rough plan PPT, documented our work, and improved my GitHub skills. • **Improvements:** I realized I need to stay more focused, improve communication, trust my teammates, and be more helpful overall. • **Future Plans:** I will finish the rough plan PPT.
23/10/2026	• **Activity:** I attended a physical group meeting where I finished the Rough Plan PPT, completed the Project Log

	PPT, and started the Master To-Do List PPT. ● **Improvements:** I worked harder during this session, staying significantly more focused and effective.

	● **Future Plans:** I will complete the Master To-Do List PPT, create the project plan, and compile the GitHub repository ZIP file. 
24/10/2026	● **Activity:** I completed the Master To-Do List PPT, project plan, and GitHub repository ZIP file, then submitted all completed tasks to the group leader. ● **Improvements:** learned to be a better teammate, and realized I shouldn't be afraid to communicate. ● **Future Plans:** Work on stage 2 
26/10/2026	● **Activity:** Re-do everything I have done and help with organising the GitHub ● **Improvements:** learned to read instructions clearly ● **Future Plans:** Work on stage 2

Saviero Shioru Dimulia 1820262033 CTO

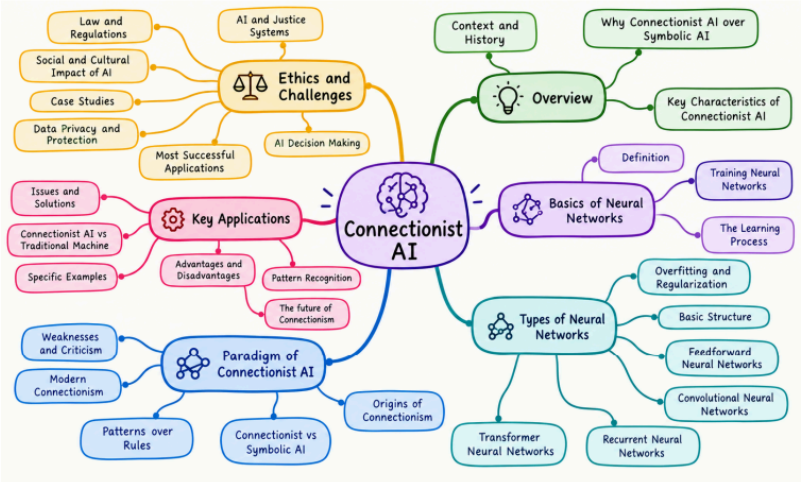

21/10/2026	• **Activity:** We reviewed the project rules and assigned roles. As CTO, I set up our GitHub repository. Since I lacked experience, I researched how to create it, practiced managing branches and uploading files, and then wrote a guide to teach my team how to use it. • **Improvements:** I overcame my lack of experience with version control through quick, independent research. I also learned the value of documentation by writing a guide to help my team collaborate smoothly. • **Future Plans:** Get the GithHub completed (https://docs.github.com/en/repositories/managing-your-repositorys-settings-and-features/repository-access-and-collaboration/inviting-collaborators-to-a-personal-repository). 
22/10/2026	• **Activity:** I created the GitHub README file with each member's username and project topic. I also set up individual workspace branches for the team, recommended an efficient flowchart maker to our tester, and designed our team logo on Canva.   • **Improvements:** I learned how to better organize our development environment by structuring individual branches to avoid workflow conflicts. Designing the logo also helped

	me combine technical setup with creative branding. ● **Future Plans:** I will monitor the workspace branches
26/10/2026	● **Activity:** We reviewed the teacher's feedback regarding our project documentation and repository structure. I then audited our GitHub repository and discovered major oversights, including several missing documents and poorly organized files. ● **Improvements:** I realized repository management requires strict adherence to project guidelines and proactive verification. I learned to cross-reference our folder layout with assignment instructions and will implement a strict commit checklist to ensure reliability and version control. ● **Future Plans:** I will fully restructure, update, and populate the GitHub repository with all missing documents. I will also coordinate with the team to support learning center preparations and ensure smooth documentation workflows.

Maxienno Jose Carvallo 1820262093 Writer

20/10/2026	● **Activity:** I analyzed the assignment requirements and broke down the instructions to understand our deliverables. ● **Improvements:** I learned to break down complex guidelines to get a clearer, structured view of our tasks. ● **Future Plans:** I will use this breakdown to guide the creation of our project components.
21/10/2026	● **Activity:** I analyzed the advantages and disadvantages of the presentation components for our PowerPoint. ● **Improvements:** I learned how to evaluate strengths and weaknesses to select the most useful information for our audience. ● **Future Plans:** I will integrate these component details into our final presentation slides.

23/10/2026	• I created a visual project flowchart to organize our presentation structure. • **Improvements:** I learned to replace heavy text descriptions with a clear, visual information workflow. • **Future Plans:** I will present this flowchart to ensure the team and audience can easily follow our project's execution. 
24/10/2026	• **Activity:** I used AI assistance to structure my learning log and designed a mind map to connect our main ideas. • **Improvements:** I learned to use AI tools for organizing written work and improved my ability to link related concepts visually. • **Future Plans:** use the mind map to keep our presentation cohesive.

	
26/10/2026	• **Activity:** Created the table of content with the help of AI assistance • **Improvements:** I learnt to listen and properly communicate with my teammates • **Future Plans:** I will maintain this structured log format for future entries and continue with stage 2
